

# [COALESCE]

## network distribution box

### COALESCE NETWORKING - CS-340

Structured Wiring provides secure, reliable, and fast connectivity between consumer electronic devices in the home. It allows you to distribute high-quality telephone, television and networking services throughout your home over a single integrated distribution box.

Coalesce is a Networking Telephone and LAN Distribution Box with can accommodate various small networking devices like PoE switch, Wired Broadband Router and telephone Splitter Switch, that controls distribution of signals coming from outside the home from service provider, including copper for Internet, and telephone.

It's a centralized distribution box, which receives all incoming services from and then distributes and connects to all in-home technology devices.

Coalesce can be customized using different optional modules like PoE Switch and IPPBX.

Coalesce is a Converged Networking Box with ready-to-connect services like Internet and Telephone.
