home network box

COALESCE HOME NETWORKING - CS-0330-01P

Structured Wiring provides secure, reliable, and fast connectivity between consumer electronic devices in the home. It allows you to distribute high-quality telephone, television and networking services throughout your home over a single integrated distribution box.

Coalesce is a enclosure that can house all the equipment that controls distribution of signals coming from outside the home, including copper and FTTH fiber optic lines for Internet, and telephone.

It's a centralize distribution enclosure, which receives all incoming services from ISP like Broadband, IPTV, FTTH, Telephony, Satellite Cable TV and then distributes and connects to all in home technology devices like LCD/LED, Media Servers, Home Theatre, Gaming Console, Wireless, multiple Set top boxes box, computer/laptop

The Front Door is specially plastic designed with perforation for Wireless signals to be easily transmitted

Coalesce can be customized using different optional modules like Switch, PoE, Telephone Splitter and IPPBX

Coalesce is a Converged Solution for structured cabling for a home
